“The Quiet Invasion”
Taking Action to Remove Invasive Plants
From The Woodland’s Open Spaces

The Woodlands G.R.E.E.N. is sponsoring a Going Green Sustainability Lecture titled **“The Quiet Invasion”-Taking Action to Remove Invasive Plants From The Woodland’s Open Spaces-** to be held via Zoom at 7:00 pm, Thursday, April 29, 2021. Teri MacArthur, Environmental Education Specialist with the Environmental Services Division of The Woodlands Township will be our guest speaker.

Access to the meeting can be made by clicking on the following address:
<https://us02web.zoom.us/j/88577860128>

The link to the presentation can also be found at the Woodlands G.R.E.E.N. Lecture Section on the front page of the web site: www.thewoodlandsgreen.org

Topic: Does it matter where a plant grows as long as it’s green? You might find the answer surprising in this discussion of invasive plant species and the damage they do to our local ecosystems. Some of the killers on our pathways and in green spaces degrade and destroy valuable native species. Air potato vine, Japanese climbing fern, nandina, privet... the list goes on. Learn about the worst, and ways to take action starting in your own landscape and helping on pathways through the collaborative efforts of local organizations

Speaker: Teri MacArthur serves the community in her role as Volunteer Coordinator and Water Conservation Specialist with The Woodlands Township Environmental Services Department, and is a Lifetime member of The Woodlands G.R.E.E.N., as well as a Texas Master Naturalist in the Heartwood Chapter, and Native Plant Society of Texas – Pines and Prairies Chapter member.

Hope you’ll join us for this important and informative conversation.

Date: Thursday, April 29, 2021
Time: 7 p.m.

HOW TO CONNECT: Visit The Woodlands G.R.E.E.N. web site at www.thewoodlandsgreen.org Click on the Lecture link on the front page. You will automatically be connected via Zoom to the presentation.
