

“Bayou Land Conservancy” -Past, Present and Future-

The Woodlands G.R.E.E.N. is proud to announce the kickoff of its 2020-2021 Going Green Sustainability Lecture series by sponsoring a talk entitled **“Bayou Land Conservancy-Past, Present and Future”** to be held via Zoom on Thursday, October 22, 2020 at 7:00 pm. Becky Martinez will be our guest speaker.

Topic: Bayou Land Conservancy (BLC) is a local land trust working to preserve land along creeks and streams for flood control purposes, the cleansing of water (runoff), and the protection of wildlife. Becky Martinez, Conservation Director at BLC, will talk to us about the lands that BLC, working with willing landowners, has protected over the last 20 years and their Strategic Conservation Plan to protect lands in the future. HINT: (Spring Creek Nature Trail and Spring Creek Greenway are included in past accomplishments list). We'll also learn how BLC connects our greater community to nature through education series, events and volunteer opportunities.

Speaker: Becky oversees land project management and strategic planning for land conservation at BLC. She earned a B.S. in Zoology from the University of Florida and an M.S. in Wildlife and Fisheries from Texas A&M University. Her previous experience focused on environmental regulatory compliance, wetlands permitting, and mitigation banking. Becky's goal is to increase and maintain BLC's preserved lands and reconnect people to the area's natural resources. When she isn't working, Becky is often found outside with her family, quarantine baking (sound familiar?), or working with her hands.

We hope you'll join us for this informative talk.
